

CSE 1111: Structured Programming Language

Class Test 01

Section D

Time: 30 Minutes

Total Marks: 20

1. Generate a correct version for the following erroneous program. (3.5)

```
#include<Stdio.H>
Int main(){
Int a, b;
Float div;
Scanf("%f%f", &a, &b);
Div=a/b;
Printf("%f", Div);
Return 0;
}
```

2. (i) Mention the data type of each of the data given below (2)
-1, 1.0, '1', "1", 1

(ii) Check whether the name of the following variables is valid or invalid. If it is invalid, mention the reason. (3)

```
int sum;
float 9uiiu;
char $pi;
int sum of bill;
float total_value;
double sum-value;
```

3. Find the values of the following variables (2.5)

```
int a= 39%4;
int b=(float) 4/39;
float c= (float) (4%39);
float d= (int) (4%39);
int e=3*4+12/4-3;
```

4. Find output when input values of b are 4, 5, 10 and 12, respectively (4)

```
scanf("%d", &b);
printf("Begin\n");
if (b>=5)
printf("UIU\n");
else if(b<=5)
printf("CSE\n");
else if ((b>=2)||(b<10))
printf("COMPUTER\n");
else if ((b>2)&&(b<=10))
printf("NICE\n");
```

```
else  
    printf("Bye\n");  
printf("End");
```

5. Draw the flowchart and write the pseudocode of the following problem:
Find the sum of the following series by considering that 25, 50, and 75 are absent in the series. Also show the sum value on monitor. (5)

$$1+3+5+\dots+100$$
