CSE 1111- Section L
Class Test 1

Name:

ID:

Q1. Write a program that will take a number as input, the number representing the month of the year (e.g 1 for January, 2 for February, 12 for December) and output the number of days present in the month. If the month number is invalid then an error message should be displayed.

Input: 1

Output: 31 days

Input: 2

Output: 28 days

Input: -10

Output: Invalid Month (10 Marks)

Q2. Write the output for the following program: (10 Marks)

```
#include <stdio.h>
int main()
{
    int a = 15, b = 17;
    int var1 = a ^ b;
    printf("Output 1 = %d\n", var1);
    int c = ++a;
    c++;
    printf("Output 2 = %d %d\n", a, c);
    int d = b + 17.8;
    printf("Output 3 = %d\n", d);

    int e = a << 2;
    int f = b >> 3;
    printf("Output 4 = %d\n", e);
    printf("Output 5 = %d\n", f);

    d *= 10;
    printf("Output 6 = %d\n", d);
    int g = (10 > 12) ? 20 : 30;
    printf("Output 7 = %d\n", g);
    int h = g++;
    printf("Output 8 = %d %d\n", h, g);
    int i = (int) 20.5 + 14.9;
    int j = 20.5 + 14.9;
    printf("Output 9 = %d %d\n", i, j);
    printf("Output 10 = Best of Luck :D !!!");
}
```
