

Php Problem with if else

```
<body>
<form method="POST">
  <label for="">Items Sold</label>
  <input type="number" name="sold"
id="">
  <button
type="submit">Calculate</button>
</form>
<?php
if ($_SERVER["REQUEST_METHOD"]
== "POST") {
  $sold = $_POST["sold"];
  $numof = $_POST["numof"];
  $target = $_POST["target"];
  $items = $sold * $numof; //cal
  echo "<br>Total items:
$items<br>";
  if ($items >= 500) {
    $performance = 'Excellent';
  } else if ($items >= 300 && $items <
500) {
    $performance = 'Good';
  } else {
    $performance = 'Poor';
  }
  echo "Performance:
$performance";
  if ($items > $target) {
    $result = "Above target by " .
($items - $target);
  } else if ($items < $target) {
    $result = "Below target by " .
($target - $items);
  } else {
    $result = "Target met exactly (0)";
  }
  echo "<br>$result";
}
?>
</body></html>
```

Table Creation Php (Xampp)

```
use campus_library;
create table book_loans(
  LoanID int PRIMARY key,
  StudentName varchar(30),
  BookTitle varchar(40),
  DayOverdue int,
  PenaltyFee Decimal(10,2),
  Status varchar(10)
);
// Insert values into Table
Insert into book_loans VALUES
(101,'Abdul','Data Structures', 0, 0.00,
'Returned'),
(106,'Fahim','Operating Systems', 0,
0.00, 'Returned');
```

Php+SQL

```
<?php
$conn = mysqli_connect("localhost",
"root", "", "sundarban");
if (!$conn) {
  die("Database connection failed");
}
echo "<h2>1. Total Revenue Per
Category</h2>";
$query1 = "
SELECT CategoryName,
SUM(Revenue) AS TotalRevenue
FROM sales_data
GROUP BY CategoryName";
$result1 =
mysqli_query($conn,$query1);
// row wise print
while($row=mysqli_fetch_assoc($resul
t1))
{
  echo $row['CategoryName']. " = " .
$row['TotalRevenue']. "<br>";
}
echo "<hr>";
$query2 = "-----";
mysqli_query($conn,$query2);
echo "Updated Successfully";
//Case Query
$query3 = "
SELECT ProductName,
CategoryName,
CASE
WHEN Revenue >
(
SELECT AVG(s2.Revenue)
FROM sales_data s2
WHERE s2.CategoryID=s1.CategoryID
)
THEN 'Top Seller'
ELSE 'Regular Seller'
END AS Label
FROM sales_data s1";
$result3=mysqli_query($conn,$query3)
;
//Final Table Print
echo "<table border='1'
cellpadding='8'>";
echo "
<tr>
<th>Product</th>
<th>Category</th>
<th>Status</th>
</tr>
";
while($row=mysqli_fetch_assoc($resul
t4))
{
  echo "
```

```
<tr>
  <td>{$row['ProductName']}</td>
  <td>{$row['CategoryName']}</td>
  <td>{$row['Label']}</td>
</tr>
";
}
echo "</table>";
mysqli_close($conn); //sql close kore
?>
```

SQL Sequence

```
SELECT Department, COUNT(*) AS
TotEmp, AVG(Salary) AS -, FROM
employee_records WHERE
Status='Active' GROUP BY Department
HAVING COUNT(*) > 2 AND
SUM(Salary) > 150000 ORDER BY TotSal
DESC LIMIT 3;
```

Table Insert/Update

```
UPDATE employee_records
SET Salary = Salary * 1.15,
  Department='IT'
WHERE Status = 'Active'
AND Department = 'IT'
AND Salary < 60000
AND ExperienceYears >= 3;
```

Best Two or 3 by Php

```
$cts = [$ct1, $ct2, $ct3];
rsort($cts);
$bestTwo = $cts[0] + $cts[1];
// Ternary Operator
$status = ($total > 54) ? "Passed" :
"Failed";
```

JavaScript (Calorie Tracker)

```
!
<body>
  <h1>Daily Calorie Tracker</h1>
  <input type="number" id="calorie"
placeholder="Enter Calories">
  <button onclick="addCalories()">Add
Calories</button>
  <h2 id="total">Total Calories: 0</h2>
  <h2 id="message">Feedback:</h2>
