Product Management System - SQL Practice

Database: product.db

Table: products

Table Columns

Column	Data Type
id	TEXT
name	TEXT
category	TEXT
price	REAL

Initial Data

ID	Name	Category	Price
P101	Laptop	Electronics	65000
P102	Mouse	Accessories	1200
P103	Keyboard	Accessories	2500
P104	Monitor	Electronics	22000
P105	Smartphone	Electronics	45000
P106	Headphone	Accessories	3500
P107	Tablet	Electronics	30000
P108	Webcam	Accessories	5000

Tasks

1. Create database and table. Insert all records.

2. Display all products.

3. Add a new product.

4. Edit product information.

5. Delete a product.

6. Show products with price greater than 30000.

7. Increase every product price by 10%.

8. Delete products whose price is below 3000.

9. Find Maximum, Minimum and Average price.

10. Search product by name (e.g. Laptop).

11. Sort products by price (ASC and DESC).

12. Count total products.

Important SQL Queries

Task 6

```
SELECT * FROM products WHERE price > 30000;
```

Task 7

```
UPDATE products SET price = price * 1.10;
```

Task 8

```
DELETE FROM products WHERE price < 3000;
```

Task 9 - Average

```
SELECT AVG(price) AS avgprice FROM products;
```

Task 9 - Maximum

```
SELECT MAX(price) AS maxprice FROM products;
```

Task 9 - Minimum

```
SELECT MIN(price) AS minprice FROM products;
```

Task 10

```
SELECT * FROM products WHERE name='Laptop';
```

Task 11 - ASC

```
SELECT * FROM products ORDER BY price ASC;
```

Task 11 - DESC

```
SELECT * FROM products ORDER BY price DESC;
```

Task 12

```
SELECT COUNT(*) AS total_products FROM products;
```
