Employee Management System - SQL Practice

Database: employee.db

Table: salarys

Table Columns

id (TEXT), name (TEXT), department (TEXT), salary (REAL)

Initial Data

E101 John HR 25000
E102 Alice IT 45000
E103 Bob Finance 30000
E104 David Marketing 28000
E105 Emma IT 52000
E106 James HR 27000
E107 Sophia Finance 48000
E108 Liam Marketing 35000

Tasks

1. Create database and table. Insert all records.
2. Display all employees.
3. Add a new employee.
4. Edit employee information.
5. Delete an employee.
6. Show employees with salary greater than 40000.
7. Increase every employee salary by 10%.
8. Delete employees whose salary is below 30000.
9. Find Maximum, Minimum and Average salary.
10. Search employee by name (e.g. Alice).
11. Sort employees by salary (ASC and DESC).
12. Count total employees.

Important SQL Queries

Task 6
SELECT * FROM salarys WHERE salary > 40000;

Task 7
UPDATE salarys SET salary = salary * 1.10;

Task 8
DELETE FROM salarys WHERE salary < 30000;

Task 9 Avg
SELECT AVG(salary) AS avgsal FROM salarys;

Task 9 Max
SELECT MAX(salary) AS maxsal FROM salarys;

Task 9 Min
SELECT MIN(salary) AS minsal FROM salarys;

Task 10
SELECT * FROM salarys WHERE name='Alice';

Task 11 ASC
SELECT * FROM salarys ORDER BY salary ASC;

Task 11 DESC
SELECT * FROM salarys ORDER BY salary DESC;

Task 12
SELECT COUNT(*) AS total_employees FROM salarys;
