LECTURE : 02

Basic Information of Bangladesh

Presented by- Nabila Sultana
Adjunct Faculty
United International University (UIU)

Bangladesh is located in South Asia and bordered by the Bay of Bengal, India, and Myanmar.

Bangladesh, country of South Asia, located in the delta of the Padma (Ganges [Ganga]) and Jamuna (Brahmaputra) rivers in the northeastern part of the Indian subcontinent.

Population of Bangladesh (2023 and historical)

Year	Population	Yearly % Change	Yearly Change	Migrants (net)	Median Age	Fertility Rate	Density (P/Km ²)	Urban Pop %	Urban Population	Country's Share of World Pop	World Population	Bangladesh Global Rank
2023	172,954,319	1.03 %	1,767,947	-309,977	27.1	1.94	1,329	40.9 %	70,806,614	2.15 %	8,045,311,447	8
2022	171,186,372	1.08 %	1,830,121	-309,977	26.7	1.95	1,315	40.2 %	68,791,790	2.15 %	7,975,105,156	8
2020	167,420,951	1.15 %	1,904,729	-61,154	25.9	2.00	1,286	38.7 %	64,814,953	2.14 %	7,840,952,880	8
2015	157,830,000	1.24 %	1,887,772	-286,512	24.0	2.11	1,212	35.0 %	55,305,132	2.13 %	7,426,597,537	8
2010	148,391,139	1.04 %	1,495,710	-462,265	22.2	2.34	1,140	31.2 %	46,347,089	2.12 %	6,985,603,105	8
2005	140,912,590	1.75 %	2,343,853	-715,970	21.0	2.81	1,083	27.3 %	38,452,976	2.15 %	6,558,176,119	8
2000	129,193,327	1.86 %	2,279,998	-424,718	19.7	3.22	992	24.0 %	31,040,651	2.10 %	6,148,898,975	8

1970	67,541,860	2.92 %	1,808,340	-193,149	16.6	6.88	519	7.3 %	4,938,975	1.83 %	3,695,390,336	9

Rivers

Total – 700

Mighty river systems: Ganges-Padma river system, Brahmaputra-Jamuna river system and Surma-Meghna river system.

Rivers of the southeastern hilly region are considered as the chittagong region river system.

Principal rivers are: Ganges, Padma, Brahmaputra, Jamuna, Surma, Kushiya, Meghna, Karnafuli, Old Brahmaputra, Arial khan, Buriganga, Shitalakshya, Tista, Atrai, Gorai, Madhumati, Rupsa-Pashur, Feni.

Padma River

Padma River the downstream of the Ganges, more precisely, the combined flow of the Ganges and the Jamuna after their confluence at Goalandaghat. In Bangladesh the Ganges is popularly known as the Padma from its point of entrance at Manakosa and Durlabhpur unions of Shibganj upazila, Nawabganj district.

Meghna River

Meghna is formed inside Bangladesh in Kishoreganj District above the town of Bhairab Bazar by the joining of the Surma and the Kushiya, both of which originate in the hilly regions of eastern India as the Barak River. Major tributaries of the Meghna include the Dhaleshwari, the Gumti, and the Feni.

Climate- Sub-tropical monsoon. Average maximum and minimum winter temperatures are 29°C and 11°C respectively; average maximum and minimum summer temperatures are 34°C and 21°C respectively. Annual rainfall 1,194 mm to 3,454 mm. Highest humidity 80% to 100% (August-September), lowest 36% (February-March).

April- most warmest

January- most coolest

Administrative units- Division 7 (Dhaka, Chittagong, Khulna, Rajshahi, Barisal, Sylhet and Rangpur); District 64; Upazila 483 and Thana 599 (2008), Union 4,498 (2008), Village 87,362; City corporation 6 (Dhaka, Chittagong, Khulna, Rajshahi, Sylhet, Barisal); municipality 309 (2008).

Religion

The United Nations categorizes Bangladesh as a moderate democratic Muslim country.

Four major religions; Islam, Hinduism, Buddhism and Christianity. A few people also follow religions like Sikhism, Bahai Faith, Sarnaism, Animism and some other religions. Islam is the largest religion in all the districts of Bangladesh.

- Secularism

At the point of ethnicity, Bangladeshi people are amalgamation of Dravidian, Proto-Australoid, Mongoloid, and Ariyan.

Tribal people

Language

National Language: Bengali (Bangla), the national language of Bangladesh, belongs to the Indo-Aryan group of languages and is related to Sanskrit. English is the second most important language.

Ethnic People's Language:

Local/ Regional Language:

The Bengali language has two distinct styles: Sadhu bhasa (the literary style) which contains many words derived from Sanskrit.

-Calit bhasa (the standard medium of informal discourse, both spoken and written)

Soils

Three main categories of soils in Bangladesh:

The old alluvial soils- found mainly in flooded areas, are usually clays and loams.

The recent alluvial soils- jungles of the Barind and Madhupur regions are dark iron-rich brown or reddish clays and loams

The hill soils- can support dense forest growth

Plant and animal life

Bangladesh in general possesses a luxuriant vegetation, with villages appearing to be buried in groves of **mango, jackfruit, bamboo, betel nut, coconut, and date palm**. However, only a small portion of the country's land surface is **covered with forests**.

The eastern zone, consisting of parts of the **Sylhet** and **Chittagong areas**, has many low hills covered with jungles of **bamboo**.

The central zone, covering parts of the country to the north of Dhaka, contains many lakes and supports **swampy vegetation**; the soil of part of this zone produces the **Madhupur jungles**.

- **Sundarbans**, with their distinctive mangrove vegetation-goran , gewa (used for making newsprint).
- **Water lilies**: marigolds, tuberoses, and Chinese hibiscus

**Rampal Power Station hampering
Sundarban's environment.**

Settlement patterns

The extremely high overall population density of Bangladesh, averaging more than 2,500 persons per square mile.

Dhaka- highest density

Chittagong- lowest density

Rural settlement- river based, mechanic solidarity, agriculture based livelihood, hut.

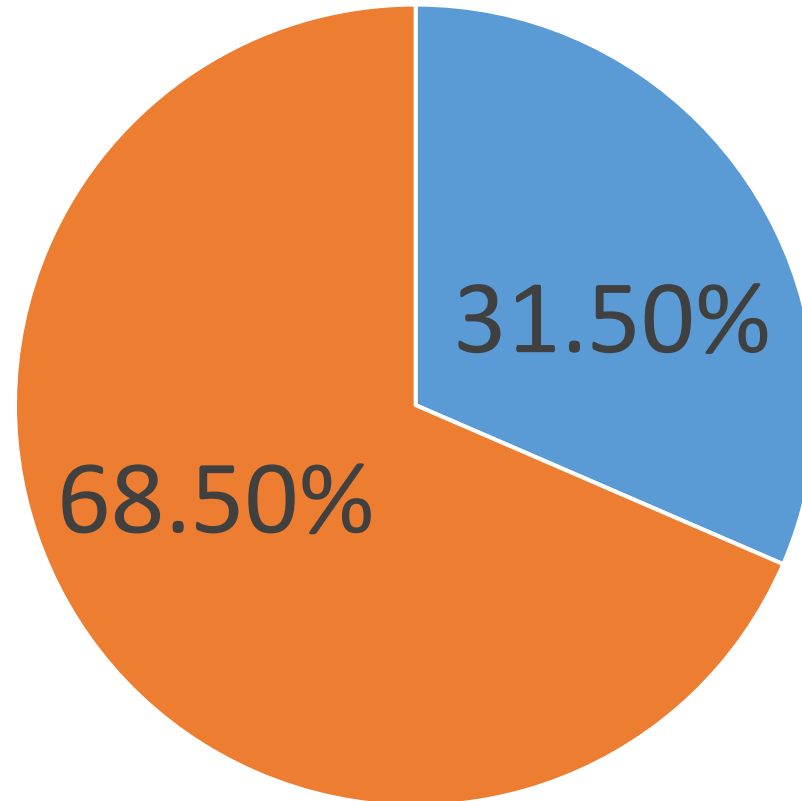

Supplies of electricity and safe drinking water, however, have remained inadequate in some regions.

Urban settlement- Industry based, organic solidarity, market oriented, commercial.

There are three major cities: Dhaka, Chittagong, and Khulna. Dhaka, the capital, is the largest. Chittagong, the country's major port, is second in importance.

Bangladesh urban-rural (2022 -2011-2001)

Sales

■ Urban ■ Rural

Demographic trends:

In the **2010s** more than **one-fourth** of Bangladesh's population was **under age 15**. Infant mortality had dropped dramatically since the late 20th century but remained high. **Life expectancy** was about **74 years**. There has been very **little immigration** since the 1970s. Many Bangladeshis, however, live and work abroad—especially in the Middle East.

Economy of Bangladesh:

Bangladesh's heavy dependence on agriculture has long contributed to seasonal unemployment among rural farmworkers.

Agriculture and fishing-

Rice is the predominant agricultural product, but jute and tea, both of which are key sources of foreign exchange, also are important.

Other major agricultural products include wheat; pulses, such as peas, beans, and lentils; sweet potatoes; oilseeds and spices of various kinds; sugarcane; tobacco; and fruits, such as bananas, mangoes, and pineapples. The country also is a leading producer of goat milk and goat meat.

The **rivers of Bangladesh** are particularly amenable to breeding and raising fish, and aquaculture is the source of more than two-fifths of the country's fish yield. However, the rivers and seacoast also offer opportunities for open-water fishing, mostly in the estuaries of the Bay of Bengal. Among the varieties of fish caught are the marine rupchanda, or pomfret, and the freshwater hilsa, a relative of the shad.

Resources and power

A major obstacle to the economic development of Bangladesh has been a general lack of mineral resources. The country's first oil well, near Sylhet, was established in 1986. Natural gas is used mainly in the manufacture of fertilizer and for thermal power. More than half the proven gas reserves are in the Comilla area, and nearly all the rest are in Sylhet.

Trade

Total annual imports typically exceed exports. Imports come principally from China and South Asia, while Bangladesh exports goods primarily to Europe, the United States, and Canada. Major exports include garments and knitwear, agricultural products, seafood, jute, and leather.

Transportation

Central to the country's transportation system are networks of waterways, roads, and railways.

Metrorail-

Elevated expressway-

Administrative System

- Government
- Local Government

Health and welfare

Bangladesh has many government hospitals and rural health centres. Tuberculosis, cholera, and malaria continue to pose threats to public health, and since about 2000 outbreaks of dengue fever have been a concern as well.

-Corona Pandemic

Education of Bangladesh

- primary
- Secondary
- higher

Literacy improved significantly in the 21st century: less than half of the population could read and write at the beginning of the century, but by the late 2010s more than two-thirds were literate.

Cultural life

The Bengali language, Islamic religion, and rural character of Bangladesh all serve to unify the country's culture to a considerable degree. Although some regional variation occurs across the Bengali community, cultural differences between ethnic, religious, and social minorities and between rural and urban populations are much more salient.

Daily life and social customs

- Extended & nuclear family structure**
- marriage**
- dowry**
- divorce**
- festivals**
- food habits**
- clothing**

The Arts of Bangladesh

Literature-

Music, dance, and theatre-

Visual art and architecture- The main figure behind the art movement was Zainul Abedin, who first attracted attention with his sketches of the Bengal famine of 1943

Sports and recreation

Media and publishing

Historical Places

Do you think these new projects like metro rail , elevated expressway are truly helpful for all kinds of people in our country? Or do these projects show real developments of our country?

THANK
YOU!
