

UNITED INTERNATIONAL UNIVERSITY
Department of Computer Science and Engineering (CSE)
Course Syllabus

Part A: Introduction

1	Course Title	History of the Emergence of Bangladesh
2	Course Code	BDS 1201
3	Pre-requisites	N/A
4	Course Type	Core Course
5	Credit Hours	2.00
6	Contact Hours	3 Hours/Week
7	Semester	1 st / 2 nd
8	Total Marks	100
9	Course Instructor's Information	
10	Course Rationale	Bangladesh was born as an Independent Country of the Bangali Nation from a series of conflicts. Struggles, Popular Movement among different forces from a geographical area that constituted British India. This course examines the series of events through which the conflicts and fights leading to the creation of a new country. We do so by asking questions: who, what, when, where, why? Who were individuals and groups in conflict? Why? What led to war? Who engaged in the fighting? Who led? Who supported which side? By asking questions and seeking answers, we can better understand the emergence of Bangladesh in 1971.
11	Course Objectives	• To understand the society of Bangladesh both from theoretical and historical perspectives • To explore the history of the emergence of Bangladesh • To provide the understanding on the historical background and structural changes of Bangladesh society • Promote a sense of citizenship and respect for the history of Bangladesh

Part B: Content of the Course

12	Course Contents (approved by UGC)	Partition of India (1947) and the then Bengal; Language Movement (1952); Movement for Autonomy; 6-point and 11-Point Programs; The 1970 Election; Speech on 7th of March 1971; Military Action, Genocide in the East Pakistan; The Liberation War; The Emergence of Bangladesh as a Sovereign Independent State in 1971; Constitution of Bangladesh and citizen rights; Culture: Cultural diffusion and change, Bengali culture and problems of society; social problems of Bangladesh; Social change: theories of social change; social change in Bangladesh; urbanization process and its impact on Bangladesh society.

Appendix-1: Program outcomes

POs	Program Outcomes
PO1	An ability to apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
PO2	Identify, formulate, research and analyze complex engineering problems and reach substantiated conclusions using the principles of mathematics, the natural sciences and the engineering sciences.
PO3	An ability to design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety and of cultural, societal and environmental concerns.
PO4	An ability to conduct investigations of complex problems, considering experimental design, data analysis and interpretation and information synthesis to provide valid conclusions.
PO5	An ability to create, select and apply appropriate techniques, resources and modern engineering and IT tools, including prediction and modeling, to complex engineering activities with an understanding of their limitations
PO6	An ability to apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice.
PO7	An ability to understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of and need for sustainable development.
PO8	An ability to apply ethical principles and commit to the professional ethics, responsibilities and the norms of the engineering practice.
PO9	An ability to function effectively as an individual and as a member or leader of diverse teams and in multidisciplinary settings.
PO10	An ability to communicate effectively about complex engineering activities with the engineering community and with society at large. Be able to comprehend and write effective reports, design documentation, make effective presentations and give and receive clear instructions.
PO11	An ability to demonstrate knowledge and understanding of engineering and management principles and apply these to one's work as a team member or a leader to manage projects in multidisciplinary environments.
PO12	An ability to recognize the need for and have the preparation and ability to engage in independent, life-long learning in the broadest context of technological change.
