| B- (Minus)          | 74-77          | 2.67               | D (Plain)           | 55-57          | 1.00               |
|                     |                |                    | F (Fail)            | <55            | 0.00               |

### **Appendix-3: Program outcomes (Engineering)**

| <b>POs</b>  | <b>Program Outcomes</b>                                                                                                                                                                                                                                   |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>PO1</b>  | An ability to apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.                                                                                    |
| <b>PO2</b>  | Identify, formulate, research and analyze complex engineering problems and reach substantiated conclusions using the principles of mathematics, the natural sciences and the engineering sciences.                                                        |
| <b>PO3</b>  | An ability to design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety and of cultural, societal and environmental concerns. |
| <b>PO4</b>  | An ability to conduct investigations of complex problems, considering experimental design, data analysis and interpretation and information synthesis to provide valid conclusions.                                                                       |
| <b>PO5</b>  | An ability to create, select and apply appropriate techniques, resources and modern engineering and IT tools, including prediction and modeling, to complex engineering activities with an understanding of their limitations                             |
| <b>PO6</b>  | An ability to apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice.                                           |
| <b>PO7</b>  | An ability to understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of and need for sustainable development.                                                                   |
| <b>PO8</b>  | An ability to apply ethical principles and commit to the professional ethics, responsibilities and the norms of the engineering practice.                                                                                                                 |
| <b>PO9</b>  | An ability to function effectively as an individual and as a member or leader of diverse teams and in multidisciplinary settings.                                                                                                                         |
| <b>PO10</b> | An ability to communicate effectively about complex engineering activities with the engineering community and with society at large. Be able to comprehend and write effective reports, design documentation, make effective presentations and give and   |

|             |                                                                                                                                                                                                                 |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|             | receive clear instructions.                                                                                                                                                                                     |
| <b>PO11</b> | An ability to demonstrate knowledge and understanding of engineering and management principles and apply these to one's work as a team member or a leader to manage projects in multidisciplinary environments. |
| <b>PO12</b> | An ability to recognize the need for and have the preparation and ability to engage in independent, life-long learning in the broadest context of technological change.                                         |
