

DBMS Lab Project Report Instructions

- Project Title
- Team Information: Names and ID numbers of all team members
- Video Demonstration Link: YouTube link demonstrating the project (optional)
- Project Code Link: GitHub repository link (optional but recommended)

Main Body

- **Introduction / Overview:** A brief overview of the project and its objectives
- **Motivation:** Rationale behind selecting the project and its importance
- **Related or Similar Projects (if any):** Discussion of existing or comparable systems
- **Benchmark Analysis:** Comparison with existing solutions or systems
- **Complete Feature List:** Detailed list of all implemented functionalities
- **Database Design Approach:** Explanation of the database design methodology
- **Entity–Relationship Diagram (ERD):** Diagram representing the database entities and relationships
- **Schema Diagram:** Detailed database schema
- **Queries for Feature Implementation:** SQL queries used to implement the features
- **Application Screenshots:** Screenshots of the application interface
- **Limitations (if any):** Identified constraints or shortcomings
- **Future Work (if any):** Possible improvements or extensions
- **Conclusion:** Summary of the project and key outcomes

Submission Instructions

- Only one team member is required to submit the report.
- The report must be prepared using LaTeX or MS Word.
- Submit the final report in PDF format.
